PRESIDENT'S WELCOME

The Toronto Academy of Dentistry welcomes the Profession to our Annual Winter Clinic. This is our Fortieth presentation and promises to be another of the "Best" one-day meetings of its kind in Ontario.

Gordon Perlmutter, your Programme Chairman, and his Committee have done an outstanding job arranging

some of the finest presentations available in Dentistry today. The amount of effort put forth by this Committee in arranging this meeting is tremendous and difficult for someone who is not involved to realize the extent and scope of effort required. To the Winter Clinic Committee and our tireless executive secretary and her staff, I would like to say thank you.

Please register early both for the limited attendance clinic and the general attendance clinics. This will alleviate the congestion on registration day.

The Academy continues to function as a viable organization, but needs the continuing support of our Members through your Local Societies. Become active in our affairs and take an interest in what is happening in your profession today.

Murray Wagman, D.D.S.

WINTER CLINIC COMMITTEE

LIVING WITH STRESS IN DENTISTRY

Kenneth J. Olson Ed. D.
Scottsdale, Arizona

Biography:

B.S. Psychology, Arizona State
Master of Divinity, Northwestern Lutheran Theological Seminary
Ed.D Counseling Psychology Arizona State University
Board of Directors, American Society of Preventive
Dentistry

Author: "The Art of Hanging Loose in an Uptight World";
"People Business in Dentistry";
"Living with Stress Successfully";
"Can You Wait Till Friday?"
"The Psychology of Hope."

Synopsis:

- I A holistic view of man and his health and disease.
- II Defining the stress and tension in your life. What are your stress activators?
- III Who wound you up so tight?
- IV People can be a pain, especially when communications break down.
- V When stress becomes distress there is tissue damage. Depression or suicide anyone?
- VI How to live with less stress in the dental office.
- VII How to stop the world and relax.

**LIMITED ATTENDANCE CLINIC – PLEASE

THREE ONE-HOUR PRESENTATIONS PER CLINIC

- I "EROSIONS: IGNORE OR RESTORE?"
- II "CARIOUS LESIONS COVERED 5 YEARS WITH A FISSURE SEALANT"
- III "A NEW CONCEPT IN MOUTH PROTECTION FOR CONTACT SPORTS"

ROBERT E. GOING, A.B., B.S., D.D.S., M.S.
GAINESVILLE, FLORIDA

Biography:

Dr. Going was born in Parma, Missouri. He holds the following degrees: Valparaiso University — A.B. (1948), University of Illinois — B.S. (1951), D.D.S. (1953) and M.S. (1959). The list of graduate and post-graduate training and positions he has held are far too numerous to list.

At present Dr. Going is Professor and Chairman of Operative Dentistry, Temple University School of Dentistry, Philadelphia, Pennsylvania, and Consultant-lecturer, the Naval Graduate Dental School, Bethesda, Md.

He has published at least 75 articles and has presented in excess of 100 clinics and lectures since 1954, and has also prepared numerous video tapes on dental materials and techniques.

Synopsis:

- I Erosions: ignore or restore?
This illustrated presentation will define a conservative approach to the restoration of Class V and VI lesions caused by erosion or abrasion. The consequences of neglecting these problem areas will also be pictorially depicted.
- II Carious lesions covered 5 years with a fissure sealant
What happens to dental caries purposely or inadvertently left beneath sealed pits and fissures? The viability and types of micro-organisms responsible for the usual destruction of tooth structure will be identified and evaluated for caries activity.

III A new concept in mouth protection for contact sports

The fabrication of a mouthguard that is adaptable to anyone desiring protection, irrespective of sport, age, or size will be discussed and demonstrated. It is durable, protective, stable, simple in design and delivery, and inexpensive enough to be available to all sports enthusiasts.

Place: TUDOR ROOM

Time: 9:00 a.m. — 12 Noon
2:15 — 5:00 p.m.

Chairman - Dr. R.S. McKegney
Chairman- Dr. B Chapnick

CURRENT CONCEPTS IN DENTAL AMALGAM

P.A. WATSON, D.D.S., M.Sc.D. (Ind.)

Synopsis:

The material will cover:

1. Current data relating physical and chemical properties to clinical performance in order to provide an objective basis for alloy selection.
2. Manipulation of copper-enriched materials and errors that affect performance.
3. Cavity design to reduce isthmus fracture in class II amalgams.

Biography:

Dr. Watson graduated from the Faculty of Dentistry, University of Toronto in 1967 and obtained his M.Sc.D. degree from Indiana University School of Dentistry in 1970.

He is presently Associate Professor of restorative dentistry, University of Toronto.

Place: ROOM "A"

Time: 9:30 — 10:30 a.m.

Chairman — Dr. J. Manly

Time: 3:45 — 4:45 p.m.

Chairman — Dr. R. Dacko

CHANGES IN COLOUR OF THE ORAL MUCOSA - - A DIFFERENTIAL DIAGNOSIS

C.O. Munroe, B.Ch.D., F.D.S.R.C.S. (Eng.), M.D.

Synopsis:

A consideration of conditions presenting in the oral cavity as colour changes and their assessment in the context of general practice. Such conditions would include white lesions, haemorrhagic conditions, pigmentations and other mucosal diseases.

Biography:

At present Dr. Munroe is Dentist-in-Chief of the dental department of Mount Sinai Hospital and Chairman, Department of Oral Medicine and Pathology, Faculty of Dentistry, University of Toronto. He graduated in dentistry from the Royal University of Malta in 1957 and has experienced a wide range of further study relating to Oral Surgery in Malta, Eastman Dental Hospital and Royal College of Surgeons in London. Further teaching in Malta, an M.D. degree, and a study of Scandinavian dental schools led to his coming to Canada in 1971 to the Faculty of Dentistry as Associate Professor of Oral Medicine.

Place: CONFEDERATION ROOM

Time: 10:45 – 11:45 a.m.

Chairman – Dr. Jeff Kirshenbaum

2:30 – 3:30 p.m.

Chairman – Dr. Harold Sobel

THE MEDICAL-LEGAL ASPECTS OF ORAL RADIOLOGY

M.S. Fireman, D.D.S., M.Sc.D.

Synopsis:

The dentist's responsibilities with regard to the examination, interpretation and reporting of radiographic findings are discussed in relation to medical-legal cases.

Biography:

Dr. Fireman received his D.D.S. degree from the University of Toronto in 1968 and his M.Sc.D. degree from the University of Toronto in 1972.

He is an Associate, Department of Radiology, Faculty of Dentistry, University of Toronto. He is also President of the Ontario Society of Oral Radiology.

Dr. Fireman is a Member of the following:—

- Medical-Legal Society of Toronto
- American Academy of Dental Radiology
- Canadian Academy of Oral Radiology
- Toronto Radiodontic Study Club
- Calcium and Bone Study Club
- Alpha Omega Fraternity

Dr. Fireman is Consultant to the Editorial Board of journal ORAL HEALTH and is author of numerous articles, including chapter in two books. He is in private practice in Oral Radiology in Toronto.

Place: QUEBEC ROOM

Time: 2:30 — 3:30 p.m.

Chairman — Dr. Allan Freedman

RESTORING THE COMBINED PERIODONTAL AND ENDODONTAL INVOLVED TOOTH

Mark Grossman, D.D.S.

Synopsis:

Various techniques are available to help make periodontally and endodontally involved teeth healthy, useful, and functional components of the dental arch. Emphasis will be given to the sequencing of treatment and to temporization. Root resection, and splinting will also be discussed.

Biography:

Dr. Grossman received his B.Sc. from McGill University in 1967, his D.D.S. from the University of Montreal in 1971, and his certificate in Prosthodontics from Tufts University in 1973. He is on staff at the University of Toronto and at Mount Sinai Hospital. He has a private practice in Mississauga, Ontario.

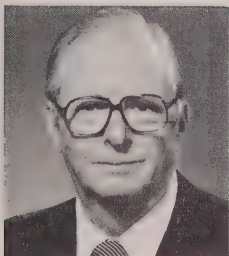

Place: ROOM "B"

Time: 10:45 — 11:45 a.m.

3:45 — 4:45 p.m.

Chairman — Dr. B. Kafka

Chairman — Dr. P. Bender

DINNER

CANADIAN ROOM

6:00 p.m.

HONORARY LIFE MEMBERSHIP

MARK G. BOYES, D.D.S.

The Academy of Dentistry, Toronto, is honoured at its Annual Winter Clinic Meeting 1977, to present for Honorary Membership in the Academy, Dr. Mark G. Boyes.

Dr. Boyes was born in Vankoughnet in Muskoka and graduated from Bracebridge High School in 1928. In 1930 he enrolled in the Faculty of Dentistry of the University of Toronto. As an undergraduate he took part in many sports activities. He played lacrosse and soccer with distinction. Upon graduation in 1935 he moved to Cobourg, and took over the practice of the late Dr. Edward Lajoie, a leading dentist in the area.

A year and a half later Dr. Boyes joined in practice with a spirited young practitioner who was making a name for himself at the time in children's dentistry, viz. Sandy MacGregor. These two fine practitioners worked together in North Toronto for nearly forty years. For the first fourteen years of their association, Dr. Boyes did general practice; then in 1950 he decided to limit his practice to children.

Throughout the war years, Dr. Boyes was secretary of the War Services Committee of the Toronto Academy of Dentistry. This Committee endeavoured to send every dental officer stationed overseas a box of food every month. This was a very time-consuming task.

The year of 1947 was an important year for Dr. Boyes. That was the year he commenced teaching at the Faculty of Dentistry, University of Toronto, and it was the year he was elected President of the North Toronto Dental Society. Dr. Boyes remained on the staff of the Paedodontic Department for twenty-six years until his retirement in 1973. In those years he was in constant contact with and became a friend of most of the dentists who are practising in Ontario at this time. This friendship was often renewed at the many clinics and seminars Dr. Boyes gave around the province.

Following Dr. Boyes' tenure as President of the North Toronto Dental Society, he became a member of the Executive Committee of the Toronto Academy of Dentistry and served as President in 1951-52.

Dr. Boyes has been closely associated with the O.D.A. for nearly thirty years. In 1946 he was a member of the Public Health Committee, eventually

Price Ripoff?

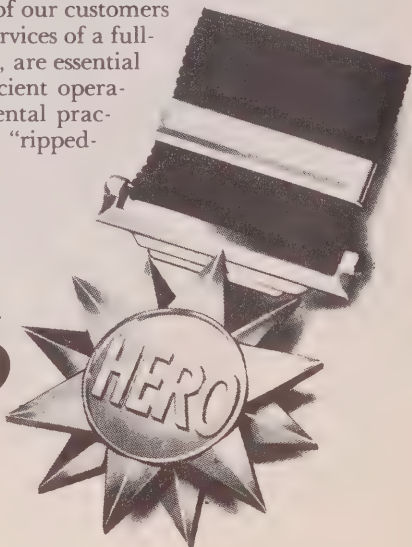

Good news for dentists who complain about the excessive prices of dental supplies! Denco knows of a way to lower them.

All we need do is reduce the quality and extent of our product-line to the barest minimum. Then eliminate our Personal Sales Representation; Quick Delivery; Repair Services; Charge Accounts; Returns and Credit Policies; Support for Dental Undergraduates; Instruction for Auxiliaries; and our involvement with the dental community. We'd be heroes. Right?

Not true. The majority of our customers firmly believe that the services of a full-line supplier, like Denco, are essential to the effective and efficient operation of a professional dental practice... and would feel "ripped-off" without them.

Believe us, Doctor.
The price is right!

DENCO

becoming Chairman. This led to his becoming a Governor of the O.D.A. and in due course he became President of the O.D.A. in 1965-66. This was the era of the reorganization of the Association and Dr. Boyes spent countless hours assisting in developing the present Constitution of the O.D.A. He still serves the O.D.A. as a member of the Benevolence Committee.

His dental interests have extended to the national scene. For eleven years he served on the Publications Committee of the C.D.A. In addition, he was a Director of the C.F.D.E. for many years.

Dr. Boyes is an Honorary Life Member of the Canadian Society of Dentistry for Children, Ontario Chapter, and an Honorary Member of O.D.A.

As a good citizen, Dr. Boyes has taken part in many community affairs. He is active in his church, Glenview Presbyterian in Toronto, and is a Past Chairman of the Board of Managers. He is an ardent gardener and is very knowledgeable in horticultural matters. He maintains his interest in sports and is an excellent golfer and curler. He and his wife, Eileen, have a home in Bracebridge.

As a teacher, a clinician, an administrator, and above all as an example to others, Dr. Boyes has served the dental profession well.

MAXIMIZING AFTER-TAX DOLLARS

R.S. DICKINSON

Synopsis:

The areas that will be discussed will be:

- (a) Planning Through Tax Deferral
- (b) Interest vs. Yield
- (c) Selecting Investment Opportunities

Biography:

R.S. Dickinson and Associates is a firm specializing in the areas of financial planning and executive compensation. Mr. Dickinson spoke at the Ontario Dental Association meeting in 1976. He has conducted seminars on various aspects of financial planning for corporations and professional associations throughout the Province. He is author of articles that have appeared in Financial Post, Executive Magazine, and other financial publications. He is also a Director of several public companies.

**HONORARY
LIFE MEMBERSHIP**

MARK ZIMMERMAN, D.D.S.

The Academy of Dentistry, Toronto, is honoured at its Annual Winter Clinic Meeting 1977, to present for Honorary Membership in the Academy, Dr. Mark Zimmerman.

Dr. Zimmerman graduated from the Faculty of Dentistry, University of Toronto, in 1925. In May 1975 he completed fifty years of practice, and is now on his 52nd year.

He has two children - Dr. G. Zimmerman, who is a psychiatrist on staff of the Jewish General Hospital in Montreal and McGill University, and a daughter who graduated in Dental Hygiene at the University of Toronto.

Dr. Zimmerman has contributed much to the dental profession by clinicing his gold work and bridge-work to dentists at various dental conventions from East to West in Canada, and in many of the outstanding conventions in the United States. For many years he participated in the operation of the Dental Clinic at the Mount Sinai Hospital. He was also on the staff of the group who took care of the dental services for the orphanage, known as the Blue and White Home, Richmond Hill.

He is a life member of the Crown & Bridge Study Club — a one time President; a member of the Academy of Dentistry — now a Life Member; a member of the North Toronto Dental Society; a member of the Alpha Omega Alumni — a one time President; a member of Pierre Fauchard Academy.

He has contributed one hundred and thirty-seven blood transfusions to the Canadian Red Cross Society.

He has received the Good Citizenship Medal and a plaque from Premier William Davis for his outstanding contributions to humanity in the service he renders to people by putting on shows and entertainment for the sick, the retarded, the crippled, the aged, and the schools and libraries.

He is on the volunteer staff of the Sick Children's Hospital, the St. Joseph Hospital and the Crippled Children's Centre. He puts on about three hundred shows a year — estimated to date over two thousand.

When he visits the children in schools he also tells them about dental health.

One of Dr. Zimmerman's hobbies, which he is best known for, is making gold jewellery and gold miniatures. He demonstrated his gold castings at McDonald Hall in Guelph, Metal Arts Guild Open House (where he is a member), and on T.V. (Tabloid). He has exhibited his work at the Royal Ontario Museum in Toronto, London Ontario Art Gallery, Hamilton Art Gallery, Canadian Dental Association Art Show, and the Canadian National Exhibition Handicraft Show where he won a number of awards. His articles on miniatures were published in Oral Health, Dental Abstracts and Alpha Omega Journal.

He is still playing squash on a daily basis - he played continuously for fifty-two years, and is a life member of Hart House.

Dr. Zimmerman has a long and outstanding reputation for his commitments to his community. He taught Sunday School for forty years, is on the Board of the Hillcrest Progressive School where he does a free dental survey every year and where his children attended and now his grandchildren.

Dr. Zimmerman serves his profession and his community with profound dedication.

There will also be a presentation of "50-Year" Certificates

SYMPTOMATIC PERIODONTAL CONDITIONS

Lieutenant-Colonel N.H. Andrews, D.D.S.

Synopsis:

This presentation will encompass those periodontal conditions which present in the dental office as emergency situations requiring immediate attention. The discussion will include the diagnosis and current therapeutic modalities utilized in the management of the periodontal abscess, acute necrotizing ulcerative gingivitis, disquamative gingivitis and herpetic gingivostomatitis.

Biography:

Dr. Andrews was born in St. John's, Newfoundland where he received his early education before proceeding to Dalhousie University in Halifax from where he received his B.Sc. in 1958 and D.D.S. in 1962.

He began his military career as a pilot in the RCAF before joining the Canadian Forces Dental Service. His assignments have been all across Canada and include a tour of duty with the United Nations Emergency Forces in Egypt in 1967.

LCol Andrews pursued his graduate studies in Periodontology at Georgetown University, the US Army Institute of Dental Research and Walter Reed General Hospital in Washington, D.C. during 1968-70.

Prior to his present appointment as Chief Instructor and Head of the Division of Periodontics at the Canadian Forces Dental Service School at CFB Borden, LCol Andrews was assigned to CFB Halifax during which time he served as an instructor in Periodontology at the Faculty of Dentistry at Dalhousie University from 1970-74.

Place: ROOM "B"

Time: 9:30 — 10:30 a.m.

Chairman — Dr. L. Stirpe

Time: 2:30 — 3:30 p.m.

Chairman — Dr. M. Panzer

EMERGENCY ESSENTIAL

Steven C. Small, D.D.S., B.Sc.D.

Synopsis:

Dr. Small will present a direct, concise outline of the emergency support care currently considered to be the responsibility of all dentists in an office emergency situation. A slide presentation will cover exactly what emergency equipment is necessary, when and how it is used. A meaningful and logical approach is emphasized.

Biography:

- . Steven C. Small, D.D.S., B.Sc.D.
- . Equal division of time between active practice and teaching.
- . Associate Professor in the Department of Anaesthesia, Faculty of Dentistry, University of Toronto, involved in graduate and undergraduate programmes of anaesthesia, sedation and emergency measures. Private practice limited to general dentistry for patients requiring special attention to pain control and management.
- . President of Ontario Dental Society of Anaesthesiology.
- . Fellow of the American Dental Society of Anaesthesiology.
- . Numerous presentations and publications concerning his special interest in dentistry.

Place: B.C. ROOM

Time: 10:45 — 11:45 a.m.

Chairman — Dr. M. Sterling

Time: 3:45 — 4:45 p.m.

Chairman — Dr. Ken Pearl

EFFICIENT ROOT CANAL PREPARATION

Wayne H. Pulver, D.D.S.

Synopsis:

This lecture will emphasize a step-by-step description of biomechanical preparation of the root canal system. Criteria will be established whereby common instrumentation pitfalls can easily be avoided. Special attention will focus on the diagnosis and treatment of problematic areas such as separated instruments, ledged canals and perforations.

Biography:

Dr. Pulver was an honour graduate from the Faculty of Dentistry, University of Toronto in 1973. From 1973-74 he was Resident, Beth Israel Hospital, Boston, Mass. From 1974-76 he was Clinical Fellow in Endodontics, Harvard School of Dental Medicine and Forsyth Dental Center. At present his practice is limited to Endodontics.

Appointments:

1976: Associate in Dentistry, Faculty of Dentistry, University of Toronto, Department of Pathology.

1977: Mt. Sinai Hospital, Department of Dentistry

Dr. Pulver is the author of many publications and has lectured extensively on the North American Continent.

Place: TERRITORIES ROOM

**Time: 9:30 — 10:30 a.m.
3:45 — 4:45 p.m.**

**Chairman — Dr. Grant Joyner
Chairman — Dr. Peter Dan**

DIAGNOSIS AND SURGICAL MANAGEMENT OF PRE AND POST PROSTHETIC PROBLEMS

John H. Gryfe D.D.S., F.R.C.D.(C).

Synopsis:

While not all problems of the potential denture wearer can be corrected or prevented by the use of scalpel, many hours of aggravation can be bypassed by judiciously assessment of the preprosthetic oral cavity. This paper will outline surgical considerations in this area, describing procedures offered, not only by the oral surgeon, but also and most important, techniques readily useful to the enterprising dental general practitioner. As well, consideration will be given to possible rehabilitation of the atrophic alveolar ridge forced to support a complete denture.

Biography:

Dr. Gryfe graduated from the Faculty of Dentistry, University of Toronto in 1964 where he obtained his D.D.S. degree. He attended the Graduate School of Medicine, University of Pennsylvania from 1965-66.

In addition, Dr. Gryfe received his Fellowship in Oral Surgery from the Royal College of Dentists of Canada in 1971; he was an Associate, Department of Pathology, Faculty of Dentistry, University of Toronto (General Pathology) from 1968-1972; he has been an Associate, Department of Pathology, Faculty of Dentistry, University of Toronto (Oral Pathology) from 1969 to the present time.

Place: B.C. Room

Time: 9:30 – 10:30 a.m.
2:30 – 3:30 p.m.

Chairman – Dr. A. Puskas
Chairman – Dr. B. Yaphe

New Products

NO-HANDS X-RAY SHIELD:

This is a handy x-ray protection shield which is held in place by a non-slip plexiglass support in the front and two lead loaded hangers at the back. Made of .5mm plastic lined lead, it protects any exposed areas against secondary radiation. It is placed in a matter of seconds and ensures patient's acceptance and co-operation ...

Available from **WEIL** ...

NEW ASPIRATOR DESIGN EXPOSES A FULL QUADRANT

It is unique tongue and cheek retractor-aspirator, anatomically correct to allow unobtrusive working area on lower quadrant from wisdom tooth to centrals. Connecting to high-power suction outlet, it is ideal for 4-handed dentistry. Sucks all moisture and secretion from the lingual and labial. It is made of a suitable plastic, which will not suck up tissue and can be sterilized up to 170°C in an autoclave, or dryheat sterilizer. Supplied in pairs of right and left. Available from **WEIL** ...

ECONOMICAL, COLOUR-KEYED INSTRUMENT TRAYS

At a saving of 30-50%, these colour coded, heavy gauge aluminum trays are ideal for instrument sterilization, using dry-heat, autoclave or gas. Each rack accommodates 13 instruments and has space for a variety of small items. The dimensions are 11 1/8" x 7 1/2" x 1 9/16" including the cover. Suitable for all sorts of procedures and ideal for Hygienist's use. The cover has a built-in bevel to accommodate the trays when in use. Stocked in five colours; silver, green, red, blue and gold.

Available from **WEIL** ...

FIRST STERILMARKER PEN

This is a specially designed felt pen used to mark any object with a purple ink which turns to green when sterilization is completed assuring that full and complete sterilization has taken place prior to use. The Sterilmarker is easy and safe to use, non-toxic and suitable for thousands of applications. One pen will draw a line over 275 yards long ...

ELEMENTS OF SURGICAL TREATMENT IN THE DELIVERY OF PERIODONTAL THERAPY

by Richard W. Chaikin

This text has been directed toward providing complete and detailed step by step illustrations of various soft tissue surgical techniques. Here the reader will find a multitude of photographs outlining the different phases of a surgical procedure in greater detail than usually attempted.

The introductory discussion of periodontia should not be overlooked. The dental practitioner will find basic concepts of periodontic therapy which should be the concern of every responsible doctor.

A special feature is the discussion of a periodontist's point of view of Electrosurgery and Implantology.

Hot off the press with 177 pages, this volume has numerous full colour illustrations.

CROWN AND BRIDGE – BEAUTIFUL BUILDUPS AND TREATMENT TEMPORIZATION

David Cowan, D.D.S.

Synopsis:

The lecture will present a simplified step by step procedure for the rebuilding of non-vital teeth using direct posts and pins with composite materials as cores for crown and bridge construction. In respect to temporization (treatment restorations) the importance of accurately fitting temporary crowns and bridges, their multitude of functions and their simplified fabrication will be described in detail.

Biography:

Dr. Cowan graduated from the Faculty of Dentistry, University of Toronto in 1962 where he obtained his D.D.S. degree. He has been on staff as an Associate in operative dentistry at the University of Toronto since 1963. He is engaged in private practice in Toronto.

Dr. Cowan is:

- Past President of Alpha Omega Fraternity, Toronto.
- Past President of Toronto Academy Crown and Bridge Study Club
- President of the Toronto Academy George Hare Endodontic Study Club
- Member of the Canadian Academy of Endodontics
- Member of the New York State Academy of Dental Practice Administration
- Associate Member of the Chicago Dental Society

Dr. Cowan has presented numerous clinical presentations in operative dentistry and crown and bridge procedures.

NOTE

Strategy.

**Your investments:
Is the income sufficient?
Is the capital secure?**

The investment scene becomes more complex; tax laws proliferate and become more onerous. You need careful and sophisticated advice if you are going to achieve your objectives.

Safeguarding and building the income and capital for an individual, a trust or an estate needs the solid advice of an investment company that takes the time to give personal service, matching individual needs with sound economic research and patient financial analysis.
